

**I am getting better at measuring and recording weight**

How much does each object weigh? (If using balance scales use cubes, counters or same size small objects, or use kitchen scales)

I am using \_\_\_\_\_ to measure mass with.

Objects	Prediction	Results
		
		
		
		

Which object was the heaviest?

---

Which object was the lightest?

---

Which non-standard units of measurement would be best to measure the mass of a heavy book? Counters, wooden blocks or pencils. Why?

---
